

Halocur®: The solution for cryptosporidiosis.

Until now the only way to treat calves with scours caused by *Cryptosporidium* was to re-hydrate them with electrolytes.

With the introduction of Halocur there's now a unique product from Intervet/Schering-Plough that acts upon *Cryptosporidium parvum*. With explicit cryptosporidiostatic activity, it treats scours caused by *Cryptosporidium parvum*, and reduces the excretion of infectious oocysts.

With Rotovec® Corona and Halocur you now have the complete picture for protection against all four main causes of scours.

Available only from your veterinarian.

Prescription Animal Remedies (P.A.R) Class I. For use only under the authority or prescription of a veterinarian.
